

## CERTIFIED FORESTRY PRODUCTS POLICY

WM Print Ltd. recognise the fact that forest management can be both environmentally appropriate and socially beneficial, when products from an independently certified forestry source are used. This policy recognises the responsibility our Company has, as a consumer of forest products, to have a neutral or positive effect upon the world's forest wherever possible.

All paper or board products that we source on behalf of our customers who specify that paper or board must be from such origins, will be purchased from either an FSC or PEFC certified supplier, and will be covered by a valid chain of custody certificate. Such purchases will avoid products emanating from illegally harvested or genetically modified wood. Additionally products that have their origins in forests with serious social conflicts will not be considered. We will obtain products for our customers from credible, globally applicable forestry certification schemes whenever the requirement is placed upon our Company.

### ***Material Categories***

There are five possible materials categories of C-of-C materials we can use:

FSC Pure	Paper made from 100% virgin material from an FSC certified forest.
FSC Mixed, (either as Mixed x% or Mixed Credit)	Paper that contains a minimum of 70% FSC material, and is made from a mixture of two or more of: (i) virgin material from an FSC certified forest; (ii) virgin material from a controlled source; and (iii) recycled material
FSC Recycled (either as Recycled x% or Recycled Credit)	Paper made from a minimum of 85% FSC certified recycled material.
PEFC Certified	Paper made with a minimum of 70% virgin material from PEFC certified forests.
PEFC Recycled	Paper made from a minimum of 85% of PEFC certified recycled material.
